# Corporate Risk | Microsoft Technology | Stronger Governance

iCoRisk sits across the Corporate Risk Management function, providing a single, collaborative solution to identify, assess, manage, and govern risk across the entire organisation.

Designed to work with your existing processes, frameworks, and governance models, iCoRisk does not force process change to fit technology. Instead, it adapts to your operational reality, delivering structure, consistency, and real-time visibility.

Powered by Microsoft, iCoRisk provides a data-driven approach to risk management, enabling informed decision-making, strong governance, and organisational agility. If you are looking to replace spreadsheets and disconnected risk processes with a modern, governed solution, iCoRisk is the ideal place to start.

## The challenge

- Risk data is fragmented across spreadsheets and systems
- Reporting is inconsistent and hard to trust
- Assurance teams spend time chasing information
- Risks aren't visible early enough to act
- Ownership is unclear across services

The result: limited confidence in reporting, delayed escalation of issues, and reduced ability to make informed decisions.

## A single, governed approach to corporate risk

iCoRisk brings together all corporate risk activity into one platform - helping you move from manual, fragmented processes to a consistent, organisation wide approach.

- A single, governed system for all corporate risk data
- Standardised frameworks, scoring, and taxonomy
- Real-time dashboards and reporting across the organisation
- Full audit trail linking risks, controls, and assurances
- Embedded workflows that align to your governance (not replace it)

*"Before adopting iCoRisk, we struggled with inconsistent risk reporting and a lack of visibility across departments. The platform has given us a single, structured way to capture, score, and monitor risks – reducing duplication, improving accountability, and helping us stay ahead of emerging issues."*

# Key Capabilities of iCoRisk

## What it gives you

- Enterprise risk register covering strategic and operational risk
- Issue and incident management in one system
- Automated workflows for escalation and approvals
- Configurable risk scoring and RAG matrices
- Mitigating controls, actions, and full audit trails
- Risk capture forms to support consistent data entry
- Live dashboards tailored to stakeholder needs
- Stakeholder and executive views for better oversight

## What this means in practice

### Before iCoRisk

- Risk data sattered across spreadsheets, emails, and siloed systems
- Different teams using inconsistent formats and scoring
- Reporting is manual, slow, and heavily reliant on individuals
- No single, trusted view of corporate risk

### After iCoRisk

- Live, organisation-wide visibility of risk exposure
- Consistent, auditable risk frameworks and scoring
- Clear ownership of risks across services and projects
- Risk embedded into everyday operations and delivery

# Complete Oversight of Corporate Risk

iCoTech applies deep expertise across risk management, governance, and the Microsoft Power Platform to give you complete oversight of corporate risk in one place.

iCoRisk enables organisations to move away from fragmented spreadsheets and disconnected tools, providing a single, governed system to capture, assess, monitor, and manage all corporate risks across the business.

## Delivering value through configuration

- Automate risk, issue, and incident requests through a personal data capture form
- Configurable risk scoring matrices and RAG thresholds
- Embed iCoRisk into Teams for better collaboration experiences
- Governance approval workflows and escalation paths
- Integration with projects as mitigating actions
- Integrate into thirdparty systems, such as Azure DevOps and Jira

## Approach

### Discovery
Discovery provides an understanding of your risk frameworks, governance structures, and organisational maturity. We can then define the processes, controls, and features required to deliver measurable success.

### Configuration
iCoRisk is configured to your operating model, aligning risk categories, scoring matrices, workflows, and reporting to your organisation. This ensures rapid delivery, while maintaining governance and control.

### Training
Tailored user and administrator training to ensure successful adoption of the solution by understanding how to capture risk effectively, interpret insights, and support leadership with accurate, real-time information.

### Deployment
Many partners continue to work with us as an extension of their team. Through ongoing optimisation, we help mature your corporate risk capability and ensure the solution evolves alongside your business.

# Optimisation Service

Our customers value having a recognised Microsoft Partner on hand to support every aspect of the Power Platform, particularly when managing complex corporate risk and governance requirements.

As long-term partners, we continue to work closely with you to support the maturity of your corporate risk management capability through our Optimisation Service. This service is designed to enhance and evolve your iCoRisk solution through targeted configuration and innovation, ensuring your technology grows in line with your business, governance, and regulatory needs.

## Support

We help you embed your risk and governance processes into a solution that is designed to drive adoption and confidence across the organisation. Our development team are on hand for training, to manage and resolve any incidents effectively through our service desk ticketing system.

## Iteration

Corporate risk requirements evolve, and our Iteration Service is designed to support continuous improvement. From minor field changes to enhanced risk scoring matrices, dashboards, Power BI reporting, and form automations, we help you consistently strengthen your corporate risk capability without disruption.

## Consultancy

Have access to our consultant team who blend expertise with knowledge, clarity and innovation. Their workshops allow you to capture and manage your evolving solution requirements as your organisation grows and matures.

## Additional waves

We make it easy to extend the days you've purchased for pre-agreed work within your existing contract. This flexible approach lets you develop and enhance your technology swiftly, keeping pace with your changing requirements.

# Discover Connected Solutions

At iCoTech, we do not believe organisations should change how they manage risks to fit technology. Instead, we configure iCoRisk to align with your existing business risk management, governance, and assurance processes.

## Close the productivity gap and accelerate the insight and value you provide to senior management

### Centralise corporate risk

Manage all strategic and operational risks from a central point. iCoRisk replaces multiple spreadsheets and isolated logs with a single, governed source of truth throughout the organisation, fitting into your technology and processes from the outset.

### Gain real-time insight

Live dashboards and automated scoring provide immediate visibility of emerging risks, trends, and exposure without manual reporting. Build custom reporting dashboards based on your stakeholders individual reporting requirements.

### Collaborate with confidence

Effortlessly collaborate across business areas, divisions, and external partners within one solution. Assign risk owners, delegate actions, and receive automated alerts and notifications.

### Strengthen governance

Built-in approval workflows, escalation paths, and audit trails ensure compliance with internal governance models and external regulatory frameworks.
